About Me

I am a passionate front-end developer with 3 years of hands-on experience building modern, responsive, and scalable web applications. Currently, I work at **Kando Company**, where I contribute to the development of **Link CRM**, which is evolving into a powerful **ERP system**.

My expertise lies in **React**, **TypeScript**, and **state management with Redux Toolkit**, alongside strong skills in **UI libraries** like **Ant Design**, **Tailwind CSS**, and **MUI**. I also explore **Vue 3** for side projects to expand my skillset.

I am committed to writing **clean, maintainable code**, delivering high-quality user experiences, and thriving in **Agile, collaborative environments**.

Experience

Kando Company — Front-End Developer

Jan 2024 – Present

- Developing **Link CRM** → **Link ERP**, a scalable and customizable enterprise system.
- Built **reusable UI components** with **React**, **Ant Design**, and **Tailwind CSS**.

- Integrated **data flows** using Redux Toolkit and Axios for state & API management.
- Contributed to building an **in-house Form Builder (Alpha version)** to dynamically generate and manage form structures.
- Improved UX/UI **consistency** across dashboard modules.
- Collaborated in an **Agile team**, participating in code reviews and applying **clean code principles**.

BootCamp Farawin — Front-End Developer Trainee

Dec 2022 – Dec 2023

- Completed intensive training in **JavaScript, Node.js, React, and modern front-end practices**.
 - Developed projects including a **Messaging Application** and an **E-commerce Application**.
 - Gained practical experience in **responsive design**, Git workflows, and real-world collaboration.
-

Education

University of Birjand — Associate's Degree in Computer Science

September 2013 – December 2016

- Gained a solid foundation in computer science principles, programming, and problem-solving techniques.
- Developed analytical skills and a passion for software development, leading to a career in front-end development.

Projects

Messaging Application

Technologies: React, Tailwind CSS

- Designed and developed a fully functional messaging application using React for the front-end logic and Tailwind CSS for modern, responsive UI design.
- Built as part of the Farawin bootcamp to enhance practical programming skills and deepen expertise in front-end technologies.
- Delivered an engaging user experience with features inspired by popular messaging platforms.

E-commerce Application

Technologies: TypeScript, React, JSON Server

- Designed and developed a scalable e-commerce application with TypeScript and React, implementing clean and efficient front-end architecture.
- Utilized JSON Server as a mock API for data management during development.
- Key features include product management, shopping cart functionality, and online payment integration, ensuring a user-friendly and dynamic shopping experience.

Skills

Programming Languages & Frameworks:

- HTML, CSS, JavaScript, TypeScript

Libraries & Frameworks:

- React, Vue.js, Tailwind CSS, MUI, Bootstrap, Sass

Tools & Technologies:

- Git, GitHub, NPM, Vite, Create React App

Development Expertise:

- Responsive Design (Flexbox, CSS Grid)
- Restful API Integration

Design Tools:

- Figma

Additional Skills:

- Problem-solving, fast learning, and effective team collaboration.
